About Us

Delivering Trust with Every Marine and power generation spare parts

At JRS, we are committed to delivering Quality Spares and Reliable Repairs for the marine and Power Generation sectors. Based in Abu Dhabi, UAE, we specialize in sourcing and supplying a wide range of genuine and OEM engine spare parts, offering tailored solutions to meet the critical needs of our clients.

With a strong reputation for dependability and customer satisfaction, our experienced team ensures that every part and service meets the highest industry standards. Whether it's routine maintenance or emergency repairs, JRS is your trusted partner to keep your operations running smoothly and efficiently.

Our Mission

To deliver high-quality marine and industrial spare parts along with reliable repair solutions that minimize downtime, enhance performance, and build long-term trust with our clients. We are dedicated to offering responsive support, technical expertise, and cost-effective services that meet the evolving needs of the maritime and industrial sectors.

Our Vision

To become the region's leading provider of marine and industrial spares and services—recognized for our commitment to quality, innovation, and customer satisfaction. We aim to set new benchmarks in the industry through continuous improvement and lasting partnerships.

Our Products

At JRS MECHANICAL EQUIPMENT (JRS), we supply a wide range of high-quality engine components built for durability and performance. Our product line includes pistons, piston rings, bearings, liners, fuel injection systems, cylinder heads, valve components, filter elements, and separators—sourced from trusted manufacturers to ensure reliability across industrial and marine applications. With a strong focus on quality and compatibility, we help our clients achieve efficient and uninterrupted operations.

Engine Bearings

We provide high-quality engine bearings designed to withstand the rigorous demands of marine diesel engines. Our range includes main, thrust, and connecting rod bearings—manufactured to OEM specifications for superior durability, load capacity, and smooth engine operation under extreme conditions.

Fuel Injection Systems

We supply precision-engineered fuel injection systems and components for marine diesel engines, ensuring optimal combustion, fuel efficiency, and engine performance. Our range includes injectors, pumps, nozzles, and complete system assemblies—sourced from trusted OEMs and built for durability in demanding marine conditions.

Cylinder Heads and Components

At JRS, we offer a comprehensive selection of high-quality cylinder head components engineered to meet the demands of modern marine engines—both 2-stroke and 4-stroke. Our focus is on durability, performance, and long-term value for our clients operating in harsh marine environments.

- Valve Stems
- Valve Seats
- Valve Rotators

Pistons & Piston Rings

At JRS, we supply a robust range of pistons and piston rings designed for slow, medium, and high-speed marine engines. Sourced from leading European manufacturers with decades of technical expertise, our components are built to perform in demanding operating conditions.

Liners and Anti Polishing Rings

At JRS, we partner with experienced manufacturers specializing in high-performance cylinder liners and anti-polishing rings for diesel and gas engines used in marine and power generation applications. Our liners are centrifugally cast using premium-grade cast iron, ranging from 150 mm to 500 mm in diameter, and are compatible with a wide range of engine models.

Filters

At JRS, we supply a comprehensive range of high-quality marine filters designed to protect critical engine and auxiliary systems from contaminants. Our offerings include oil filters, fuel filters, air filters, and water separators—engineered for maximum filtration efficiency and durability.

Turbochargers and Cartridges

JRS supplies high-quality spare parts for a wide range of marine turbochargers, supporting efficient engine performance and reduced downtime at sea. We specialize in both Genuine and OEM components, sourced from trusted manufacturers. 1. ABB – IHI 2. MAN 3. Napier 4. Mitsubishi 5. KBB

Coolers & Heat Exchangers

JRS delivers reliable coolers and heat exchangers designed for efficient thermal management in marine applications. Our range includes charge air, lube oil, freshwater, and seawater coolers—available as complete units or spare parts like tube stacks, gaskets, and seals. Built for durability and corrosion resistance, all components ensure optimal performance at sea

Generator Automatic Voltage Regulators (AVR)

JRS is committed to the design and manufacturing of Automatic Voltage Regulators (AVRs) for generators. We have supplied more than 40 types of voltage regulators used across various generator excitation systems, including Self-Excited (Shunt), Separately Excited, Compound Excited (AREP), Auxiliary (AUX), Harmonic, and Permanent Magnet (PMG) systems for both brush and brushless generators.

Genset Controller and Automatic Mains Failure

JRS generator control units are high-reliability OEM, universal, and aftermarket replacements suitable for a wide range of generator and engine types. The JRS Auto Mains Failure (AMF) module provides complete genset control and protection, while also functioning as a monitoring and control controller for the Automatic Transfer Switch (ATS).

Engine Overhaul Service

At JRS, we understand that your engine is the heart of your work, whether it is powering a ship across the seas or running vital power systems. If it slows down, your business slows down too. That is why our engine overhaul service in Abu Dhabi focuses on speed, accuracy, and reliability, so you can get back to full performance quickly.

Turbocharger Overhauls

At JRS, we supply a robust range of pistons and piston rings designed for slow, medium, and high-speed marine engines. Sourced from leading European manufacturers with decades of technical expertise, our components are built to perform in demanding operating conditions.

Fuel pump overhaul service

Our expert team provides complete fuel pump overhaul solutions to ensure reliable performance and extended service life. The process includes thorough inspection, dismantling, ultrasonic cleaning, replacement of worn-out or damaged parts, precision calibration, and final testing under standard conditions. We handle a wide range of marine and industrial fuel pumps with utmost care, ensuring optimum efficiency, reduced downtime, and cost-effective operation.

Electricals instrumentation

We provide comprehensive electrical and instrumentation solutions for industrial and marine applications. Our services include installation, maintenance, calibration, troubleshooting, and repair of electrical systems, control panels, sensors, transmitters, and other instrumentation devices. With skilled technicians and precise diagnostic tools, we ensure optimal system performance, safety compliance, and minimal downtime for your operations.

Governors

Governors and actuators are vital components in power generation and process equipment. We supply and service units from leading brands such as Woodward, Regulateurs Europa, Zexel, Yanmar, and Heinzmann.

Our governor service process includes:

1. Initial test run on a test bench to assess condition & performance
2. Complete disassembly, ultrasonic cleaning, and inspection
3. Documentation & quotation of required spare parts for approval
4. Reassembly with new parts and repair kits, followed by protective recoating
5. Final adjustment and testing as per manufacturer's specifications and checklist
6. Secure packaging and preparation for shipment

Recondition of engine parts

We provide high-quality reconditioning services that often exceed OEM standards. Our process begins with a detailed examination to identify causes of damage and evaluate engine health, ensuring reliability and early detection of potential issues.

Key services include:

1. Reconditioning of main engine exhaust valve spindles & seats
2. Reconditioning of piston crowns & cylinder heads
3. Turbocharger crack repair and reconditioning
4. Repair and overhaul of electrical motors of all capacities

Reconditioning of Engine Parts

JRS gladly supports MAN, Mitsubishi, Wartsila, MAK, Deutz, Akasaka, Caterpillar, Yanmar, Daihatsu, Hanshin, Wichman, Rolls Royce-Bergen, Detroit, & Niigata primary engines.

Marine fuel pump and injectors service

Our Marine Fuel Pump and Injector Service ensures reliable engine performance and fuel efficiency for your vessels. We provide complete inspection, cleaning, calibration, and repair of fuel pumps and injectors to restore them to OEM standards. Using advanced testing equipment and genuine parts, we remove carbon deposits, repair worn components, and optimize spray patterns for precise fuel delivery. Regular servicing helps reduce fuel consumption, lower emissions, and extend engine life, ensuring smooth operations at sea.

- Main Engine Fuel Pumps & Injectors
- Auxiliary Engine Pumps & Injectors
- Fire Fighting Engine Pumps & Injectors
- Bow Thruster Fuel Pumps & Injectors

Starter Motor And Alternator Service

We provide expert servicing, repair, and replacement of starter motors and alternators to ensure reliable engine performance and efficient power supply. Our services include complete inspection, cleaning, testing, and overhauling of components to restore optimal functionality. With skilled technicians and quality parts, we guarantee smooth engine starting, consistent charging, and long-lasting performance

- Diesel engine starter motor repairing
- Bosch / Delphi Alternator Service
